panther protect

Vanhora Gaspard, Alaya McCall, Martha Mwangi, & Chenice Taylor

the problem

Human trafficking takes many forms, including forced labor, domestic servitude, sexual exploitation, and debt bondage.

- According to the U.S. Department of State:
  - approximately 27.6 million people were in forced labor (2021)
  - 17.3 million are exploited in the private sector, 6.3 million in forced commercial sexual exploitation, and 3.9 million in forced labor imposed by the state.

- According to Human trafficking courts :
  - About four of every 100,000 people in Georgia are human trafficking victims.
  - Georgia has the 7th highest human trafficking rate in the United States.
  - The total number of reports drastically increased in the last few years, from about 98 in 2012 to 417 in 2019.

Although exact numbers are unknown since they are vastly underreported, there have been many confirmed cases of human trafficking on U.S. college and university campuses.

objective

The Panther Protect website aims to bring awareness to this topic by providing updated news, safety tips, and information about human trafficking hotspots near the Georgia State University Atlanta Campus
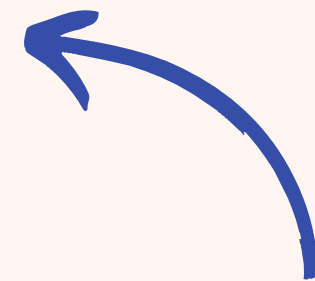

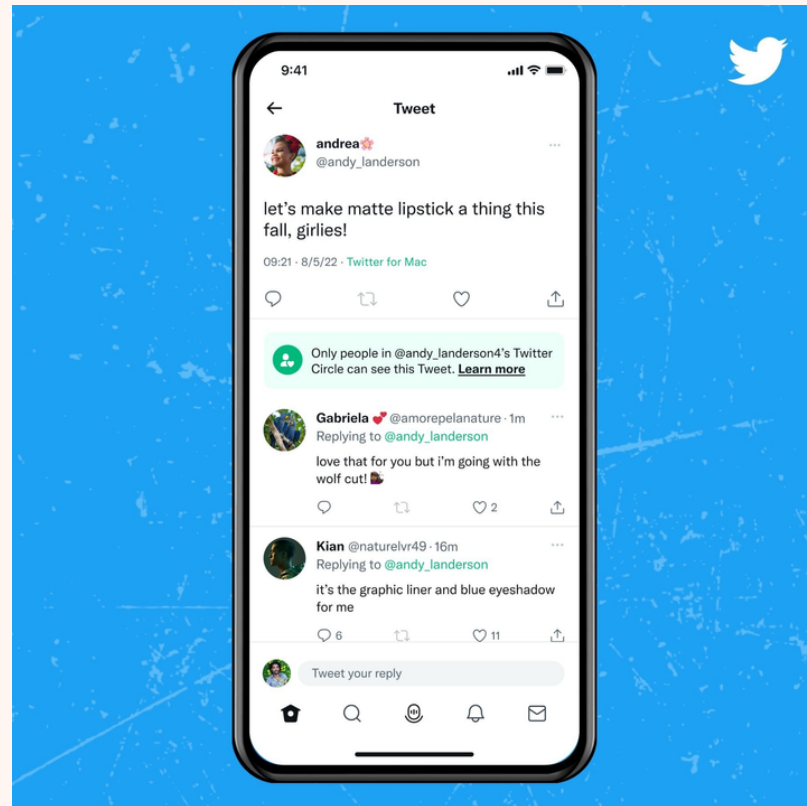

Inform Panthers

- Hotlines
- Safe spots (call box locations)
- Self protection tips
- Increasing awareness

Interact with Panthers

- Interactive and updated maps
- Active forum
- Dicscussion post
- Updated newsfeed

idea implementation

Easy communication

consumer-creator balance

Sharing news on feeds

Route recommendations

Map Alerts

When creating this site, our goal was to create a safe environment for us and other students on campus. We hope our platform can be as helpful and interactive to you as we expected. At GSU, Panthers are thriving individuals; as much as career and academic opportunities, Panthers deserve safety. Panthers protect each other!!
#PANTHERPROTECT

project timeline

Analysis (1-3 wks):
- Discuss the websites purpose and requirements
- Discuss key elements of the project
- Specify target audience
- Discuss overall user interface

Design (1-3wks):
- Create design for user-interface
- Plan and assign development tasks using figma

Development (1 - 3 months):
- Learn and begin coding for website
- Implement features, functionality, and databases interactions
- Test and debug code

Testing(1-3wks):
- Perform unit testing
- Test across browsers and devices
- Identify and resolve any bugs
- Receive feedback with user testing and make necessary changes

Deployment (1-4wks):
- Choose a hosting provider and set up the server environment.
- Deploy the website to a production server.
- Configure domain name and DNS settings.
- Monitor server performance

martha's contributions

- **Built Flask framework for website**
- **Made ReadMe on Git**

vanhora's contributions

- Building the back end for the website using Flask
- Creating and imbeded map of Atlanta on the website using HTML and CSS
- Power point

```html
<> map.html U ✕
Panther-Protect > <> map.html > ...
1    <h1>Panther Protect Map of Atlanta</h1>
2    <div class="google-map"></div>
3    <iframe src="https://www.google.com/maps/embed?pb=!1m18!1m12!1m3!1d212270.96497726988!2d-84.5849451246814
4    </div>
```

```css
# map.css U ✕
Panther-Protect > # map.css > ⚓ .google-map iframe
1    .google-map {
2        padding-bottom: 50%;
3        position: relative;
4    }
5
6    .google-map iframe {
7        height: 100%;
8        width: 100%;
9        left: 0;
10       top: 0;
11       position: absolute;
12   }
```

- **Prevention Tips**

- **Graphs**

chenice's contributions

- **As the front-end developer, I created HTML files for every page on the website**
- **Began a CSS styling page for the homepage and navbars for the rest of the website**

- **Designed the logo for Panther Protect**
- **Created layouts of the web pages using** [Freeform](#)

panther protect

Thank You!
